

Як розабрацца ў лямпачках

Энергетычная эфектыўнасць – прыярытэтны накірунак для Еўрапейскага саюза. ЕС фінансуе шэраг ініцыятыў па скарачэнні спажывання энергіі ў рэгіёне Усходняга партнёрства. Пераход да выкарыстання LED-лямпачак змяншае выкіды CO₂ і забяспечвае адчувальную эканомію энергіі.

Тып лямпачкі	 LED	 Флюарэсцэнтная	 Лямпа накіравання
Кошт	€ € €	€ €	€
Тэрмін службы	 =       =                                                  		
Эканомія энергіі	 80% 	 75% 	 
Магутнасць у ватах	 14-20W	 23-30W	 100W
Яркасць	 14-20W	 1500-1600 Люмены	 100W
